

# -Tayeebeh Golnaz Golsabahi-

Islamic Republic of Iran - Nominated by CIMCIM

## → POSITION OF MEMBER

*As a leading organisation in the world of museums and a global stage, ICOM, with its landscapes encourages all family of museums to be involved in this universal forum. Behind the scenes of museums, there are many active professionals. More experiences, discoveries, learning and educating, in order to gain the best result of museums' activities are priorities of these experts. Ultimately, those are the people who anonymously change museums' world and bring about new achievements, motivations and approaches. Many women in museums, especially in under-developed societies, particularly in political conditions of unrest, have been tried consistently due to limitations or boundaries. In order to appreciate all these efforts, I would like to take this opportunity to encourage behind-the-scenes colleagues, women in museums and others who suffer from unpleasant conditions to collaborate more through national and international platforms, to provide better conditions for their professional involvement in the ICOM landscape. If elected, I also would like to be in the service of Farsi-speaking countries, by raising awareness about diverse cultural legacies, education and developing professional skills, to provide more sustainable museums in these culturally rich but unstable regions.*
