RED LIST OF BRAZILIAN CULTURAL OBJECTS AT RISK

RED LIST

OF BRAZILIAN CULTURAL OBJECTS AT RISK

Why a Red List for Brazil?

The cultural heritage of Brazil is protected by strong national and international laws, but this diverse heritage is still at risk of being stolen, looted or illegally traded. The purpose of this *Red List of Brazilian Cultural Objects at Risk* is to contribute to the protection of cultural heritage by identifying the type of objects that are most at risk.

Museums, auction houses, art dealers and collectors are urged not to acquire objects similar to those presented in this Red List, without having carefully and thoroughly researched their origin and all the relevant legal documentation. Any cultural artefact that could have originated from Brazil should be subject to detailed scrutiny and precautionary measures before any transaction is concluded.

In cooperation with ICOM Brazil and a dedicated team of Brazilian specialists, ICOM has published this *Red List of Brazilian Cultural Objects at Risk* thanks to the support of Itaú Cultural and Moreira Salles Institute.

Protecting cultural heritage

Every day, somewhere in the world, objects are either stolen, looted or illegally sold on the market or online, resulting in an irreparable loss of heritage of great historical, scientific and societal value. Over the past 30 years, the illicit trade in art and antiquities has become a serious issue which transcends borders and whose impact reaches far beyond the loss of cultural heritage.

Since 2000, ICOM has published Red Lists that detail categories of endangered cultural goods from all over the world. These Red Lists have become important instruments in the fight against the illicit traffic in cultural goods. Red Lists are practical tools that help in particular art and heritage professionals, and law enforcement officials, identify cultural objects that are protected by national and international legislation.

The ICOM Red Lists were preceded by the *One Hundred Missing Objects* series: an ICOM publication that high-lighted missing cultural objects. For decades, ICOM has been at the forefront of actions to protect heritage from illicit trafficking, using the unique experience of museum professionals to assist heritage and non-heritage experts alike identify and protect cultural heritage.

IMPORTANT NOTE

A Red List is NOT a list of actual stolen objects.

The cultural goods depicted are inventoried objects within the collections of recognised institutions, public property belonging to the State, or images which are in the public domain. They serve to illustrate the categories of cultural goods protected by legislation which are most vulnerable to illicit traffic.

ICOM AND THE PROTECTION OF CULTURAL HERITAGE

The International Council of Museums (ICOM) was established in 1946 to represent museums and museum professionals worldwide. ICOM is committed to the promotion and protection of natural and cultural heritage, present and future, tangible and intangible. With a unique network of over 45,000 members in 123 countries and territories (2021), ICOM is active in a wide range of museum and heritage related disciplines.

ICOM maintains formal relations with the United Nations Educational, Scientific and Cultural Organization (UNESCO) and has a consultative status with the United Nations Economic and Social Council (ECOSOC) as an expert in the fight against illicit traffic in cultural goods. ICOM also works in collaboration with organisations such as INTERPOL, the World Customs Organization (WCO) and UNIDROIT to carry out some of its international public service missions.

The protection of heritage in the event of natural disaster or armed conflict is also at the core of ICOM's work, supported by its members, and its national and international committees and through its strong involvement in the Blue Shield, of which it is a founding member. In the event of a crisis, ICOM can mobilise its network of experts in the field of cultural heritage from all over the world.

In 2013, ICOM also created the first *International Observatory on Illicit Traffic in Cultural Goods* in order to reinforce its actions in fighting illicit traffic with a database of resources on the subject available online (<https://www.obs-traffic.museum/>).

The Red Lists have been designed as practical tools to fight the illegal trade in cultural objects. ICOM is grateful for the unwavering commitment of the experts and institutions who generously contribute to the success of the Red Lists.

All the Red Lists are available on ICOM website: <https://icom.museum/en/>
